§05 · ANSWER STRUCTURE

Four words that hold an oral answer together.

CAUSE 01

INDICATION 02

ACTION 03

PREVENTION 04

SWIPE →

§05 — PART 01 / 04

01

Cause.

What has to be true for this to happen? Name the conditions, not just the event.

E.G. SCAVENGE FIRE

Oil residue in the scavenge space plus blow-by past worn rings.

§05 — PART 02 / 04

02

Indication.

How would you know? What you'd see, hear or read on the gauges, earliest signs first.

E.G. SCAVENGE FIRE

One unit's exhaust temperature climbing; turbocharger surging.

§05 — PART 03 / 04

03

Action.

What do you do, in order? Who you inform, what you make safe, what you keep running.

E.G. SCAVENGE FIRE

Inform the bridge and Chief; keep the engine turning and lubricated.

§05 — PART 04 / 04

04

Prevention.

How does it not happen again? Maintenance, checks and procedure. This is where judgement shows.

E.G. SCAVENGE FIRE

Clean scavenge spaces; drain the scavenge drains; rings in tolerance.

§05 — WHY IT WORKS — FIG. 05.6

05.6

Examiners follow up on gaps. Structure means fewer gaps.

And when nerves hit, it tells you what to say next. It works for fires, explosions, leaks, blackouts and most “what would you do” questions.

§05 — NEXT STEP — WAITLIST OPEN

Next: a scavenge fire, run through all four.

Follow so you don't miss it. Waitlist in bio.
